**Bench Testing Preparatory Course in  
Restorative Dentistry for International Students**

- Very good program, I learned a lot from this program, the staff was very helpful and generous to come over to us and answer our questions.
- The program was excellent.
- The entire course should be given to us on the CD.
- I had a great time...very productive and helpful. Even if I don't get accepted I now know what I can and can't do and what I need to practice on. It was a great course and the people/faculty is beautiful. Thank you!!
- A week is not enough, it should be at least 10 business days/2 weeks. I got the concepts criteria and all the principles for the preparation but I would have learnt better if the length of the program was 2 weeks.
- Very good program. I got the opportunity to review concepts, practice and get to know the University environment.
- The program was intensive. The faculty was readily available & answered all of my questions. Sometimes there were some minor distractions like computers were not working.
- It would be nice to have more cast examples to work on and practice for removable partial dentures. It doesn't have to be individual cast for everyone, but different to practice designs only. Other than that, I had a great opportunity to practice and receive good professional, friendly feedback! Thank you.
- Very useful. I got the opportunity to practice clinical skills and get to know the University clinical environment.
- To be honest this program is excellent. Before coming to the program I thought I could do well in the bench exam, but it wasn't true. When I started the preparation (cavity/crown) for the first time on Tuesday I didn't do well. But after the guidance of all the doctors I learned the concepts. I did much better towards the end of the program.
- This program helped me a lot, I am very satisfied. The faculty was efficient and clearly explained everything.
- The hands on session really helped, I believe that I was able to improve my clinical skills. I really appreciate the faculty for having been there when we wanted their help. They explained everything regarding the preps very well that helped me to refresh my knowledge about them.
- This is an excellent program for IDDP students. I suggest that you show the demonstration of the crown cutting and RPD.
