TRIMESTER: [Spring]

DEPARTMENT: Oral & Maxillofacial Surgery
COURSE TITLE: Clinical Surgical Pathology

MAIN PURPOSE OF THIS COURSE:
This course is designed to enhance the student’s clinical skills by their participation in the presentation of various clinical cases that require extensive diagnostic work-up. The development of proper differential diagnosis, utilization of contemporary laboratory tests and radiographic imaging will be emphasized. Finally, the students will formulate surgical treatment plans for each case based on the information provided. This course will enhance the student’s management of various pathologic conditions after proper consultation with specialists, which may avoid needless pre and post-operative complications.

COURSE CONTENT:
See course outline on reverse side. Lectures include

OBJECTIVES OF COURSE:
After Completion of this course the student should be able to:
1. Immunologic Defects: Identify common HIV induced Oral lesions and their medical and surgical management.
2. Ulcerative Conditions: Differentiate between bacterial, viral and neoplastic ulcerative lesions.
3. Premalignant Lesions: Differentiate between erythroplakia and leukoplakia and their chemotherapeutic and surgical management.
4. Odontogenic Cysts: Identify common and aggressive odontogenic cysts such as odontogenic keratocysts which may mimic odontogenic tumors.
5. Odontogenic Tumor: Differentiate between aggressive and nonaggressive odontogenic tumors and be familiar with surgical modalities in each cases.
6. Fibrous Osseous Lesions: Identify important fibroosseous lesion such as giant cell lesion, fibrous dysplasia and be familiar with contemporary diagnostic and surgical modalities.
7. Unknown cases: Identify the clinical manifestations of significant oral lesion such as lymphomas, which may be presented as an infectious process.

EVALUATION OF STUDENTS:
Pass/Fail

PROGRAM DESCRIPTION

Number of students: Limited to [enter maximum # of students]
Number of students: Unlimited __X__
Number of weeks of Program: 6 weeks
Number of hours of Program:
Didactic: 6 hours
Clinic: 0
Other: [specify and enter other hours]
TOTAL: 6 hours

COURSE DIRECTOR(S): Dr. Talib A. Najjar, DMD,MDS, Ph.D.
