### CODA Residency Worksheet Overview

- If reporting on multiple residents, the first section of the report will display a comprehensive total of procedures recorded by selected residents. Individual resident reports will follow the comprehensive report.
- Only procedures performed by residents as the operating surgeon or first assistant to an oral and maxillofacial surgery attending staff member, not as first assistant to another resident, are included.
- CODA categorizes some procedure codes in multiple major and/or subcategories. If these procedure codes were entered in your Program's Log, you must run "Report 113b – CODA Category Exceptions Worksheet" to assist you in manually reviewing each procedure to determine which category is appropriate. Totals may require modification after evaluating the "Exceptions Worksheet".
- Totals contemplate the number of times a procedure code was uniquely recorded.
- Codes shown reflect available and active CPT and CDT codes.
