

RUTGERS HEALTH  
**School of Dental Medicine**  
Continuing Education

## FALL 2024 CDE COURSES

The New Jersey Board of Dentistry requirement for each biennial renewal period, ten of the forty credit hours for dentists, must be completed as follows:

- 3 hours of cardiopulmonary resuscitation (CPR).
- 3 hours of pharmacology and internal medicine.
- 2 hours of infection control in dental settings.
- 1 hour in professional ethics and NJ law concerning the practice of dentistry.
- 1 hour in educational program concerning prescription opioid drugs.

Our courses that can fulfill these requirements will be indicated by this tag: **SBRC**

**\*\*REMINDER\*\*** U.S. Drug Enforcement Administration (DEA) issued guidance outlining requirements for a one-time, eight-hour training on “treatment and management of patients with opioid or other substance use disorders.” The Medication Access and Training Expansion (MATE) Act passed as part of the Consolidated Appropriations Act of 2023, requires all DEA registered providers to complete this training.

Our courses that can fulfill both State Board and DEA MATE requirements will be indicated by this tag:

**SBRC / DEA MATE**

– For Dentists and Dental Team Members –

*15th Annual*

Rutgers School of Dental Medicine  
and The American Academy of  
Implant Dentistry

Ten Friday to Sunday Modules  
September 2024 to June 2025

### *Featured Speakers In This Issue...*

**NANCY DEWHIRST, RDH, BS**  
Tuesdays, August 13 & 20

**JASON GOODCHILD, DMD**  
Wednesday, September 18

**TROY SCHMEDDING**  
Friday, September 20

**ROBERT A. LOWE, DDS, FAGD**  
Wednesday, September 25

**MICHAEL J. RIBERA, DMD, MS**  
Friday, September 27

**KEVIN EARLE**  
Wednesday, October 9

**RYAN WALSH**  
Friday, October 25

---

The Association for Continuing Dental Education (ACDE), including RSDM CDE and 37 other member schools, are jointly sponsoring a series of live webinars, featuring university-based key opinion leaders presenting on numerous topics to meet every dental professional's interests and schedule.

15th Annual

September 2024 – June 2025

Rutgers School of Dental Medicine and The American Academy of Implant Dentistry

## A Comprehensive Hands-On Training Program in Implant Dentistry

### The MaxiCourse® Advantage

- 300+ hours of comprehensive lectures, live surgeries, demonstrations and hands-on sessions.
- Hands-on patient treatment under direct supervision. (*Bring your own patients.*)
- In-depth review of surgical and prosthetic protocols.
- Non-commercial course covering a wide spectrum of implant types and systems.
- *Course satisfies educational requirement for Associate Fellowship in AAID.*

### Program Directors

**JACK PIERMATTI, DMD, FACP, FAAID**

Clinical Assistant Professor, PG Prosthodontics  
Department of Restorative Dentistry  
Private Practice in Voorhees, NJ

**SHANKAR IYER, DDS, MDS**

Clinical Assistant Professor  
Departments of Restorative Dentistry and Periodontics  
Private Practice in Elizabeth, NJ

### Program Information

- Dates:** Ten Friday to Sunday Modules  
Beginning September 13, 2024 and  
Ending June 1, 2025
- Time:** 8:00 a.m. to 5:00 p.m. each day
- Location:** Rutgers School of Dental Medicine in  
Newark, NJ
- Tuition:** \$16,275 – Register by August 15, 2024  
\$17,275 – Register after August 15, 2024
- Credits:** 300 participation credit hours

This program has been designed to impart the understanding of diagnostic and treatment modalities necessary to properly treat patients who are candidates for dental implant therapy. The 300-hour interdisciplinary approach utilizes case-based learning methodology including lectures, demonstrations, interactive seminars, hands-on sessions, patient treatment, and relevant reviews of literature emphasizing evidence-based clinical approaches.

**\*REMINDER SBRC REQUIREMENTS**

**For each biennial renewal period, ten of the forty credit hours for dentists are now to be completed as follows:**

- 3 hours of cardiopulmonary resuscitation (CPR).
- 3 hours of pharmacology and internal medicine.
- 2 hours of infection control in dental settings.
- 1 hour in professional ethics and NJH law concerning the practice of dentistry.
- 1 hour in education program concerning prescription opioid drugs.

### REGISTRATION CONFIRMATIONS

are sent two weeks prior to the course date.

Confirmation includes directions, parking information, room location, registration time, a receipt for tuition paid, etc.

We encourage early registration, as this helps to avoid unnecessary course cancellations.

If you plan to register late, call to ensure space is available and to confirm logistical details.

*Residents and postdoctoral students must include a letter from their program director verifying status.*

**REGISTRATION FEE.** Includes tuition, registration, handout materials, coffee breaks, lunch for most full-day courses, and other amenities involved in making this a pleasant learning experience. Residents and postdoctoral students must include a letter from their program director verifying status.

**CANCELLATIONS & SUBSTITUTIONS.** Cancellations received up to two working days before a course are refundable, minus a \$35 registration service charge (unless otherwise noted in a course outline) – or you may apply the full registration fee toward a future course within the same academic year. After that, cancellations are subject to the entire registration fee.

**SPECIAL NEEDS.** RSDM complies with the Americans with Disabilities Act. If you require special services, facilities or dietary considerations (vegetarian or otherwise) to support your participation in this activity, please contact Sherri Wilson at 973-972-6561.

**SUNSHINE ACT STATEMENT.** In compliance with the Physicians Payment Sunshine Act, the Office of Continuing Dental Education may release participants' names to applicable manufacturers who at times may provide an educational grant, in-kind and/or technical support for our programs.

**PARTICIPANT CREDIT VERIFICATION.** All participants are required to sign-in at the start of the course and following lunch. Credit letters will be provided at the End of the day and will not be mailed. Participants arriving late (one-half hour after course begins) or who may need to leave prior to completion will be asked to sign and note their arrival/departure times. Participants should complete the self-reporting section of their credit letters. CDE will adjust the database to reflect the actual number of hours received. The participant's transcript will reflect actual credit hours if called upon by the State Board to verify attendance.

### SPONSORSHIP:

These courses are sponsored by the Rutgers School of Dental Medicine (RSDM).

### Continuing Dental Education Staff

Administrative Coordinator II

## General Information

**CREDIT:** The Rutgers School of Dental Medicine (RSDM) is an approved course sponsor by the New Jersey Board of Dentistry. Our courses, which deal with the scientific or clinical practice of dentistry, professional responsibilities, or ethical obligations of the profession, fulfill Board requirements for dentists' license renewal. Credit hours are granted on an hour-for-hour basis, provided the course is completed as designed.

RSDM is an ADA CERP Recognized Provider; the current term of acceptance extends to 6/2025. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the CE provider or to ADA CERP at [www.ada.org/cerp](http://www.ada.org/cerp) Rutgers is also an Academy of General Dentistry, approved national sponsor for FAGD/MAGD credit.

**NOTE:** Dental educational institutions are obligated to disseminate new knowledge related to dental practice. In so doing, some presentations may include controversial materials or commercial references. Sponsorship of a continuing dental education course by the Rutgers School of Dental Medicine does not necessarily imply endorsement of a particular philosophy, procedure, or product by this institution. Rutgers School of Dental Medicine reserves the right to modify course content, faculty and meeting locations; and also reserves the right to cancel a program, if necessary.

**NOTE:** The registered participant grants permission to the Office of Continuing Dental Education (and its designees and agents) to utilize the participant's image, likeness, actions and/or statements in any live or recorded audio, video, or photographic display for exhibition, publication, or reproduction made of, about, or at an activity without further authorization or compensation.

The Rutgers School of Dental Medicine is a proud member of the Association for Continuing Dental Education. Founded in 1991, the ACDE provides a forum for cooperative, collaborative and mutual support among directors of university-based CDE programs. The ACDE mission is to provide high quality programs with superior educational value to dental care professionals.

## Hot Topics in Infection Control – And Some Cool Tips! (SBRC)

Update and review the most important dental safety concerns and get some cool tips for these hot topics! Optimize the most effective strategies to manage today's safety challenges, including bloodborne, droplet, contact & airborne diseases, and apply laws, guidelines, and practices to prevent and control infection.

### Learning Objectives:

- Prioritize safety strategies that are the most effective.
- Update safety standards for bloodborne, contact, droplet, and airborne diseases.
- Manage special challenges such as biofilms and related health concerns.
- Review basic infection prevention science.

Presented by:

**NANCY DEWHIRST, RDH, BS**

Diplomate, American Board of Aesthetic Dentistry

Ms. Dewhirst graduated from the University of Southern California, practiced dental hygiene for 20 years, is an adjunct dental hygiene faculty at West Coast University, and a member of Sigma Phi Alpha. Ms. Dewhirst is consistently listed as one of the nation's "Leaders in CE." She presents over 100 seminars a year, is featured at major U.S. and Canadian Dental Conferences, and is a member of the California Dental Association Speakers Bureau. She is Editor-in-Chief of OSAP's Infection Control In Practice, has many articles published in dental peer-reviewed journals, and has contributed to dental textbooks and guidance documents.

## **Better Medicine, Better Dentistry**

### Updates for the Treatment of Medically-Complex Dental Patients

### **(SBRC)**

We commonly see medically-complex patients. Management of these patients include not only understanding the chronic disease states but also the medications the patient is taking. And finally, how does all this information potentially change how, when, and where these complex dental patients should be treated?

This interactive program looks at some of your most critical patients, common disease states and their management. Case studies will augment the delivery of key points and a problem-based learning approach is encouraged so that each participant's questions are addressed. Most importantly, you will learn at least five strategies to successfully treat medically-complex patients on Monday morning; after all, the goal is to make sure all dental appointments are not just successful for your patient, but also for you and your staff.

#### **Objectives:**

- Understand the four main challenges of assessing medically-complex dental patients.
- Discuss the concept of procedural risk and how to select and de-select appropriate patients.
- Describe the four main risk factors to consider when treating medically-complex patients.
- Review common disease states and/or conditions such as diabetes mellitus, cardiovascular disease, antibiotic prophylaxis, bleeding disorders, and more.
- Learn how to plan and implement a strategy for safe and effective dental treatment of patients with complex medical histories.

Presented by:  
**JASON H. GOODCHILD, DMD**

Jason H. Goodchild, DMD received his undergraduate degree from Dickinson College in Carlisle, Pennsylvania. He went on to receive his dental training at the University Of Pennsylvania School Of Dental Medicine (Philadelphia, PA).

Dr. Goodchild has published numerous peer-reviewed articles and lectures internationally on the topics of treatment planning, treatment of medically-complex dental patients, restorative dentistry, pharmacology, emergency medicine in dentistry, enteral sedation dentistry, and dental photography publications and dental textbooks. He is a founding member of the World Clinical Laser Institute.

He is currently the Vice President of Clinical Affairs at Premier Dental Products Company (Plymouth Meeting, PA), an Associate Clinical Professor in the Department of Oral and Maxillofacial Surgery at Creighton University School of Dentistry (Omaha, NE), and Adjunct Assistant Professor in the Department of Diagnostic Sciences at the Rutgers School of Dental Medicine (Newark, NJ). Dr. Goodchild maintains a private general dental practice in Jenkintown, PA.

\$235 Dentists / Code: 25D0203

## Laying It Down: Create Beautiful Anterior Composite Restorations – HANDS-ON WORKSHOP –

With contemporary direct composite systems, now the clinician can truly be an artist by conservatively and esthetically creating restorations that are so lifelike that they virtually emulate the beauty of natural tooth structure. However, rehabilitating or enhancing a smile with direct composite resins can be a challenge. The task not only requires an understanding of the intricacies of shade selection, but also a mastery of replicating the uniqueness of natural tooth morphology and luster of the restoration. The key elements and methods for the creation of life like restorations, which are critical for excellence in anterior composite resin restorations, will be discussed.

### Course objectives:

- Composite characteristics.
- Layering strategies.
- Finishing and Polishing Techniques

Guest Speaker:  
**TROY SCHMEDDING, DDS**

DR. TROY SCHMEDDING is a 1993 honors graduate of Arthur A. Dugoni School of Dentistry in San Francisco, California. Dr. Schmedding maintains a private practice in Walnut Creek, CA focusing on aesthetic and functional dentistry. Dr. Schmedding was a Course Director at the University of the Pacific and has published numerous articles of the topics of restorative materials and protocol driven Dentistry. An Accredited member of the American Academy of Cosmetic Dentistry, he lectures both nationally and internationally on Aesthetic, Restorative and Adhesive Dentistry. Dr. Schmedding shares his knowledge with numerous dental manufacturers helping to stimulate new product development for our profession.

### LIMITED ENROLLMENT

**Friday, September 20, 2024**

9 am. to 5 p.m. / 7 participation credit hours

IN-PERSON at the Rutgers School of Dental Medicine

\$395 Dentists / Code: 25D0204

## THE INTERNET COURSE: Orofacial Pain from a Medical Perspective

Learn the latest in orofacial pain diagnosis and management from the comfort of your home or office. This innovative, online course is a formal educational experience. Emphasis will be on the diagnosis and management of patients with neuropathic, neurovascular (headache) and musculoskeletal disorders.

See our website for complete information including a syllabus – [cde.sdm.rutgers.edu](http://cde.sdm.rutgers.edu)

**Begins September 16, 2024 and ends by May 9, 2025**

\$2,595 (US) Dentists - register by August 15, 2024

\$2,695 (US) Dentists - register after August 15, 2024

96 credit hours upon completion of post-test / Code: 25D0830

## Simplifying Posterior Composite Restorations – Bulk Fill and Bioactive Materials – HANDS-ON WORKSHOP –

In this lecture/hands-on course, Dr. Lowe will discuss and demonstrate techniques to create morphologically precise direct posterior composite restorations. An emphasis will be placed on the use of bulk fill materials, including flowable resins, to help decrease layering in simplify posterior composite placement. Bioactive “smart” materials also offer an interesting restorative option. Learn when and where the use of these materials is indicated. Today’s composite restorative materials, in combination with finishing techniques, will enable simple, yet “world class” placement of state-of-the-art restorations for your patients tomorrow!

### Objectives:

- Discuss bulk fill restorative alternatives and their use.
- Learn where bioactive materials can help in the restorative process.
- Discuss how sectional matrix can accurately reproduce contact and contour for proximal surfaces.
- Learn techniques to manage soft tissues when placing composite resins.
- Finishing and polishing techniques that create natural surface texture and reflection.

### You will learn hands-on:

- Class I and II composite restorations using bulk fill restorative materials.
- Indications for the use of bioactive bases and liners.
- Minimally invasive preparation using fissurotomy and smart burs.
- Class V bioactive composite restoration.

Guest Speaker:

**ROBERT A. LOWE, DDS, FAGD, FICD, FADI, FACD**

Diplomate, American Board of Aesthetic Dentistry

**Education:** DDS, magna cum laude, from Loyola University School of Dentistry, where he taught Restorative and Rehabilitative Dentistry

**Training:** Residency in Restorative and Rehabilitative Dentistry, Aesthetic Dentistry, Periodontics, Prosthodontics, Sedation Dentistry. Rotation in Surgical Anesthesia.

**Experience:** Full-time private practice for 30+ years. Authored and published articles in respected dental publications and dental textbooks. He is a founding member of the World Clinical Laser Institute.

**Memberships:** American Dental Assoc., American Academy of Cosmetic Dentistry, and American Society of Dental Aesthetics.

---

### Wednesday, September 25, 2024 – Limited Enrollment

9 am. to 5 p.m. / 7 participation credit hours

\$395 Dentists / Code: 25D0205

## Creating Predictable and Excellent Endodontics

### – HANDS-ON WORKSHOP –

If your goal is to attend a presentation packed with simple, efficient, and clinically relevant information for immediate integration into your day-to-day workflow, this lecture is designed with you in mind. The program is full of what-you-need-to-know pearls regarding the latest concepts, techniques, and technologies in performing predictable and high-quality endodontic treatment. Technique animations and clinical video/DVD-clips illustrating diagnosis procedures, safe and efficient access, glide path management, optimum shaping, hydrodynamic disinfection, and obturation of root canal systems in three dimensions will be shown to hopefully take effective clinicians into a level of higher performance and personal satisfaction. In the hands-on workshop, each workstation will be equipped with the armamentaria necessary to implement the learned techniques and to participate fully.

#### Learning Objectives:

- Importance of establishing accurate diagnoses via reliable pulp testing techniques and CBCT.
- Effectively achieve straight line access and avoid separating instruments.
- Appreciation of the power and versatility of operating microscopes.
- Strategies that maximize negotiating root canals to length while avoiding blockages.
- Understanding of the importance of owning the glide path for rotary/reciprocation files to follow in order to optimally shape canals.
- Reliable management of working length determination and rationale for apical and lateral patency.
- Efficiency and safety of the single file shaping technique.
- Efficient use and logical sequence of intracanal irrigants and chelating agents.
- Effective hydrodynamic disinfection of the root canal system.
- Advantages of the pre-enlargement technique, thermosoftened obturation, and sealer hydraulics during 3-D compaction.

Guest Speaker:

**MICHAEL J. RIBERA, DMD, MS**  
Diplomate of the American Board  
of Endodontics

Dr. Michael Ribera is a 1984 graduate of Boston College and a 1989 graduate of Harvard School of Dental Medicine. In 1990, he completed a general practice residency at Harvard's Brigham and Women's Hospital, and in 1992 received his Certificate in Endodontics and Master of Science Degree from Northwestern University Dental School in Chicago.

Dr. Ribera is a member of the District of Columbia Dental Society, a specialist member of the American Association of Endodontists, a Diplomate of the American Board of Endodontics, and a member of the Endodontic College of Diplomates. He is the 2006 recipient of the District of Columbia Dental Society's David Mast Award for excellence in continuing education. Dr. Ribera is fluent in Spanish, French and Italian.

#### Limited Enrollment

**Friday, September 27, 2024**

9 a.m. to 5 p.m. / 7 participation credit hours  
IN-PERSON at Rutgers School of Dental Medicine  
\$395 Dentists / Code 25D0201

**The Rutgers School of Dental Medicine**  
**gratefully acknowledges**  
**technical support for this activity**  
**from Dentsply.**

## 2 TOPICS / 1 DAY

PRESENTED BY DR. RYAN WALSH

### “Anesthesia for Numbies, The ‘How to Guide’ for Dental Anesthesia”

Effective anesthesia shouldn't be a guessing game, it should be your “A” game. Every dentist has had a “Hot Tooth”...the one that couldn't get numb. That tooth is every dentist's – and EVERY PATIENT'S – worst nightmare. Learn how to gain your patient's trust and confidence to perform the best treatment complete and predictable anesthesia. We will discuss the most effective anesthetics with the best techniques to provide profound and repeatable anesthesia for every dental procedure. We will also review which adjuncts work...and which don't. Learn the best techniques to turn that “Hot Tooth” into a sleeping giant.

#### During this program, practitioners will learn:

- Easy and effective tricks that help take the fear out of anesthesia.
- The best anesthetic protocol to use for every type of treatment.
- How to utilize adjunctive techniques and instruments to provide profound anesthesia.
- Amazing pain management before, during and after dental treatment.

### Lights, Camera, Irrigation!

#### Endodontic Irrigations for the General Dentist

With all of the gadgets and widgets on the market, how do you decide what to use for your endo irrigation. We will discuss the best tools techniques and products to disinfect your root canals predictably and efficiently. Dive deep into irrigating solutions with this program and elevate your root canal irrigation strategies.

#### After this course, attendees will learn:

- The pros and cons of dental irrigating solutions.
- Which irrigant solutions can be mixed and which cannot.
- The different types of solution activation.
- Which instruments/techniques provide the best activation.
- To develop an irrigation protocol to maximize canal cleanliness.

Guest Speaker:

#### RYAN M. WALSH, DDS

DR. RYAN M. WALSH is a Board-Certified Diplomate of the American Board of Endodontics and an Adjunct Clinical Professor at Texas A&M College of Dentistry where he teaches in the clinic and lectures to dental students. Dr. Walsh is actively involved in research relating to bio-ceramic materials and clinical outcomes. He also participates in the National Dental Practice-Based Research Network, which is a nationwide group of dental providers committed to advancing knowledge of dental practice with evidence-based research.

\$235 Dentists / Code: 25D0206

## GUIDELINES for Continuing Dental Education Requirements

The New Jersey Board of Dentistry requires, for every license renewal period, 40 hours of continuing education for licensed dentists in New Jersey. This 40-hours now also includes 10 mandatory hours for Dentists (Dental Hygienists and Registered Dental Assistants have 6 mandatory hours) in the following:

- 1. Cardiopulmonary Resuscitation (CPR)**, per American Heart Association certification standards. Includes use of an automatic external defibrillator (AED), unconscious and conscious choking, and rescue breathing. Training must be done in-person.  
*3 hours for Dentists / 3 hours for DH & RDA*
- 2. Pharmacology and Internal Medicine**, includes appropriate use of analgesics, antibiotics, local anesthesia, and agents to control anxiety, drug (medication) knowledge and interactions, prescription writing, abuse of prescriptions by patients, taking complete medical histories, and the use of the NJ Prescription Monitoring Program.  
*3 hours for Dentists*
- 3. Preventing and Controlling Infectious Diseases** and managing personnel health and safety concerns related to infection control in dental settings.  
*2 hours for Dentists / 1 hour for DH & RDA*
- 4. Professional Ethics and NJ law concerning the practice of dentistry** and managing personnel health and safety concerns related to infection control in dental settings.  
*1 hour for Dentists / 1 hour for DH & RDA*
- 5. Educational programs or topics concerning Prescription Opioid Drugs**, including responsible prescribing practices, alternatives to opioids for managing and treating pain, and the risks and signs of opioid abuse, addiction, and diversion.  
*1 credit hour for Dentists / 1 hour for DH & RDA*

Please visit the New Jersey Board of Dentistry website for complete details.

## Survey of Current Updates in Dental Ethics and the Law (SBRC)

Presented by:

**KEVIN B. EARLE, MBA, MPH**

To keep New Jersey Dentists abreast of the latest developments on the regulatory front and in the ADA Code of Professional Conduct, this course will cover:

- Newly passed legislation permitting dentists to administer HPV and flu vaccinations, the status of rulemaking by the Board of Dentistry, and the emergency authorization for dentists to administer COVID vaccinations.
- A discussion about the White Paper on the Ethics of Vaccination issued by the ADA Council on Ethics, Bylaws and Judicial Affairs.
- HIPAA considerations on requesting COVID-19 vaccination status of patients and employees.
- New Board regulations on training and limitations on the use of injectable pharmacologics (like Botox™).
- New laws and Board regulations on telemedicine and telehealth.
- New Board regulations on anesthesia and sedation.
- New requirements for all dentists to have AEDs, positive pressure oxygen and CPR/ACLS training.

\$49 for Dentists / Code: 25D0208-D09

**Wednesday, October 16, 2024**

7:30 to 8:30 p.m. / 1 credit hour

ONLINE through Rutgers School of Dental Medicine

\$49 for Dentists / Code: 25D0208-D16

## Oral Medicine Nuts and Bolts

### A Systematic Approach to Evaluation of Benign and Malignant Oral Soft Tissue Lesions

#### Oral Health Management of Patients with Oral Cancer

Presented by: MAHNAZ FATAHZADEH, DMD, BSC

In addition to examining the dental and periodontal structures, the oral health practitioner is required to be familiar with the plethora of oral lesions which can present in the oral cavity. This interactive, case-based presentation will provide practical guidelines for accurate initial assessment of lesions most commonly seen in the dental office and provide the oral health care provider with a level of comfort when he/she must make clinical decisions regarding management.

- What are the variations of normal in the oral cavity?
- Which lesions may be diagnosed clinically and how?
- How long should one “watch” a lesion?
- Which lesions should be assessed immediately/referred?
- Indications for biopsy and different types of biopsy techniques.
- How to treat commonly occurring conditions such as traumatic ulcers, canker sores, fever blisters, pyogenic granulomas, ANUG, thrush, angular cheilitis, hairy tongue, symptomatic geographic tongue.
- Follow-up regimen and documentation process.

Prevention and early detection of oral cancer is a professional responsibility. More than 50,000 cases of oral cancer are diagnosed each year in the United States and about 10,000 Americans die from this disease annually. Treatment of advanced carcinoma is associated with significant morbidity and despite recent advances, the survival rate from advanced carcinoma remains unsatisfactory primarily due to late-stage diagnosis. Early detection dramatically improves prognosis and survivorship. Through illustrated case presentations, this program reviews:

- Epidemiology, risk factors and presentation of oral cavity and oropharyngeal cancer.
- Clinical spectrum and management of oral cavity pre-cancer.
- Role of adjunct techniques in early detection of premalignant lesions in oral cavity.
  - Classification, epidemiology, transmission, and natural history of HPV infection.
  - Pathogenesis of HPV-induced oral warts & oropharyngeal malignancies.
- Therapeutic complications of advanced oral malignancy and their management.
- How would current or previous therapy for oral cancer impact dental care?
  - Prevention of oropharyngeal cancers through HPV vaccination.
- Role of dental professionals in the prevention of oropharyngeal cancer.

Code 25D0801

## Opiate Prescribing and Alternatives in Pain Management (SBRC)

Understand the importance of pain management in dental practice. Recognize that we have a choice of drugs that we can use. This course should help the participants adapt an evidence-based approach to patient management rather than use a one size fits all strategy.

- Pain and dentistry – Why, where, and how?
- What drugs do we have available?
- Opiates – What is good about them?  
When do we need these drugs?
- Opiates – What is bad about them?
- Legal/administrative issues with opiate prescribing in New Jersey.

Presented by:

**KENNETH MARKOWITZ, DDS, BS**

Associate Professor

Department of Oral Biology

## **Substance Use Disorder: Implications For Oral Health & Provision of Dental Care (SBRC)**

This program provides an overview of the epidemiology, pathogenesis, risk factors and systemic complications of opioid and stimulant use disorders and discuss the impact of addiction to these drugs on oral health and provision of dental care. provides tips on screening for SUD in dental settings and safe opioid prescribing for dental pain. The role of dental provider in the overall management, prevention of oral and dental complications as well as habit cessation is also emphasized.

### **Course Objectives:**

- Describe brain reward system and pathogenesis of substance use disorder.
- Take relevant history, identify risk factors and recognize oral and systemic signs and symptoms of SUD.
- Understand the potential impact of SUD on oral health and provision of dental care.
- Assess patient's medical stability for safe delivery of oral health care .
- Understand pain physiology, appropriate dental pain management and safe opioid prescribing.
- Increase their confidence and skills in communicating with patients.
- Learn about the basics of habit modification and role of dental providers in facilitating recovery.

Faculty:

**MAHNAZ FATAHZADEH, BSC, DMD, MSD**

Professor and Director of the Division of Oral Medicine  
Department of Diagnostic Sciences

## **Strategies for Comprehensive, Complication-Free Implant-Based Restorative**

In the ever-evolving landscape of implant dentistry, practitioners are met with a burgeoning array of opportunities to cater to a diverse and expanding patient demographic. Gone are the days when the traditional extract, implant, and restoration protocols sufficed. Today, the demands of patients extend far beyond the conventional, necessitating a nuanced approach to planning and coordination for optimal restorative outcomes.

In this lecture, we delve into the pivotal role of meticulous planning and seamless coordination in achieving superior results, spanning from straightforward implant cases to intricate rehabilitations.

### **Course Objectives:**

- Explore the diverse treatment options offered to patients pursuing implant treatment, encompassing traditional approach as the basic guideline.
- Gain proficiency in the fundamental principles crucial for effectively treating a spectrum of implant cases, ranging from straightforward to intricate.
- Develop proficiency in treatment planning across the spectrum of implant cases, from straightforward to complex, ensuring comprehensive patient care.
- Master the strategic sequencing of treatment plans to achieve simplicity and predictability in outcomes, optimizing patient satisfaction and clinical success.

Faculty:

**HODA YOUSEF, DMD**

Associate Professor

Department of Restorative Dentistry

---

**Friday, October 4, 2024**

10 a.m. to 5 p.m. / 6 credit hours

IN-PERSON at the Rutgers School of Dental Medicine

\$185 Dentists / Code: 25D0101

## Medical Update: Review of the MD in DMD

The contemporary dentist is presented with medically challenged patients who function independently in society due to recent advances in medical management. Many patients with chronic conditions are managed on an outpatient basis with expected extended lifespans. As a result, the dentist will encounter patients with complex medical conditions that require a thorough understanding of disease processes and implications of dental therapeutic interventions including pharmacological modification.

This course will present an update and review of the more commonly seen medical conditions for dental practitioners. It will present useful and practical management guides for treatment of medically compromised patients, including a review of commonly prescribed medications and their implications to dental treatment.

### Objectives:

- Review common medical conditions and current therapeutic interventions.
- Relate medical conditions to their impact on delivery of dental services.
- Discuss patient evaluation in ascertaining relative risks in performing dental procedures.
- Establish guidelines and limitations in the delivery of dental services based upon medical conditions.

Faculty:

### Department of Oral & Maxillofacial Surgery

**RABIE SHANTI, DMD, MD**, Associate Professor

**VICTOR PETRIELLA, DMD**, Assistant Professor

**SALVATORE NAPOLI, DDS, MD**, Associate Professor

---

**Wednesday, October 23, 2024**

10 a.m. to 5 p.m. / 6 credit hours

IN-PERSON at Rutgers School of Dental Medicine

\$185 Dentists • \$135 Auxiliaries/Residents

Code 25D0903

## Introduction to Orofacial Pain

This lecture will serve as an introduction to the field of orofacial pain and the various sources of pain in the orofacial area, other than those coming from the teeth. For instance, myofascial trigger points can refer pain to the teeth and gingiva and can be mistaken for a toothache and may lead to unnecessary endodontic treatments or even extractions.

We will cover various other sources of orofacial pain such as mid-face migraines, post-traumatic trigeminal neuropathy, etc. This lecture is aimed at general dentists, and at the conclusion of the lecture, they should be able to differentiate between the various categories of orofacial pain.

### Topics to be covered:

- Various categories of Orofacial Pain
- Myofascial toothache
- Neuropathic toothache
- Neurovascular toothache
- Toothache due to sinusitis/ malignancy

Faculty:

**SOWMYA ANANTHAN, DMD, MSD**

Assistant Professor

## Patient Monitoring for Nitrous Oxide Analgesia Delivery (DH & RDA) & Recertification for Dental Hygienists & Registered Dental Assistants

This course meets the requirements set forth by the NJ Dental Board to provide three hours of didactic training necessary for recertification of a licensed dental hygienist or registered dental assistant practicing under direct supervision of a licensed dentist to monitor a patient whom the supervising dentist has administered nitrous oxide/oxygen inhalational anesthesia. Particular emphasis will be given to recognition of complications and other untoward events so that participants are able to quickly terminate the nitrous oxide analgesia delivery along with other necessary appropriate steps including summoning the supervising dentist. This course will be in lecture format with group discussion.

### Upon completion of this course, participants should be able to:

- Take a medical history and complete a review of systems based upon the patient interview.
- Recognize and assist in management of common medical emergencies in the dental office.
- Understand the pharmacology of nitrous oxide and its effects on organ systems.
- Understand techniques for nitrous oxide analgesia delivery including preoxygenation, titration, monitoring and termination of anesthesia delivery.
- Be aware of complications of nitrous oxide analgesia administration including their recognition and management.
- Review safety features of modern nitrous oxide analgesia armamentarium including scavenging and monitoring systems available today.

Faculty:

**VINCENT B. ZICCARDI, DDS, MD**, Course Director  
Professor and Chair

ONLINE through Rutgers School of Dental Medicine  
\$105 Dental Hygienists & Registered Dental Assistants  
Code 25D0904

## Total Comfort in Dental Hygiene and Periodontal Treatment: Procedural and Post-Procedural Considerations

A number of common dental procedures, such as tooth scaling with an ultrasonic instrument can result in severe pain. This pain may be a reason patients avoid needed treatment. Post-treatment tooth sensitivity may also be a distressing side effect of periodontal and hygiene procedures. This course is designed to help dentists and dental hygienists understand and manage the symptoms accompanying periodontal therapy. A detailed discussion will be held of how most cases of procedural pain can be managed without using nerve blocks.

### Topics to be covered:

- Sources of pain in periodontal procedures.
  - Differentiating periodontal from tooth derived pain.
  - Understanding why tooth roots are sensitive.
  - Identification of patient factors that may predispose to pain and sensitivity.
- Management of pain during periodontal procedure.
  - Use of topical anesthetics.
  - Use of topical dentin desensitizers.
- Local anesthesia techniques in periodontal pain control.
  - Infiltration versus block injections.
  - Choice of anesthetic agents that allow most patients to be managed with infiltration.
- Post treatment sensitivity.
  - Treatment options: sensitivity home care products and professional treatments.

Faculty:

**KENNETH MARKOWITZ, DDS, MSD**

Associate Professor

Departments of Oral Biology and Restorative Dentistry

IN-PERSON at the Rutgers School of Dental Medicine  
\$145 Dentists / Code: 25D0302

## Pharmacology and Internal Medicine for Dentists (Inclusive of 1 hour of Opioids) (SBRC)

The course will focus on the fundamentals of pharmacology and internal medicine as related to the practice of dentistry.

### Training includes the appropriate use of:

- Analgesics.
- Antibiotics.
- Local anesthesia / agents to control anxiety.
- Drug (medication) knowledge and interactions.
- Prescription writing.
- Abuse of prescriptions by patients.
- Taking complete medical histories.
- The use of the New Jersey Prescription Monitoring Program (NJMPMP)

*This course should satisfy the three hours required  
by the NJ Board of Dentistry.*

## Two-Implant Mandibular Overdenture: Restoring Quality of Life, as Well as Teeth – HANDS-ON WORKSHOP –

Approximately 10% of Americans over the age of 18 are completely edentulous. A conventional maxillary denture suits the needs of most patients. However, mandibular dentures have problems with retention, stability, function and esthetics. This creates a less than ideal quality of life for these patients. A two-implant supported overdenture overcomes many of these problems and can be relatively cost effective, especially if their existing denture can be retrofitted at chairside obviating the expensive laboratory costs. The morning lecture is followed by an afternoon hands-on laboratory session consisting of restorations in mannequins.

### Topics to be covered:

- Diagnosis and treatment planning.
- Implant placement.
- Impression techniques.
- Restorative options (bar, ball attachments, locators & magnets.)
- Retrofitting an existing denture.
- Overdenture economics.
- Complications

### Objectives:

- Improve quality of life of your patients.
- Increase your patient pool.
- Offer additional service in your practice.

Faculty:

**BARRY ZWEIG, DDS**

Professor, Department of Oral & Maxillofacial Surgery;  
Professor, Department of Periodontics;  
and Director of the Dental Implant Center

**HEBA ELKASSABY, BDS**

Assistant Professor, Department of Restorative Dentistry

### Limited Enrollment

**Friday, November 15, 2024**

9 a.m. to 4 p.m. / 6 participation credit hours

## SUBSTANCE USE DISORDERS TRAINING (DEA MATE & SBRC)

This course is designed to meet the new DEA MATE initial or renewal registration requirements.

This hybrid course with on-site (6.5 hours) and self-paced (1.5 hours reading assignment) is structured to satisfy the new DEA requirement for any practitioner with a DEA license or new applicants for the same. The objective for this new DEA requirement, as per the DEA website, is to “promote understanding of SUDs as well as their identification, treatment and management.” This goes into effect as of June 27, 2023.

### Topics to be covered include, but not limited to:

- Neuroanatomy and neurophysiology of pain, substance abuse and addiction: pain pathways, pain mechanisms; neurons; receptors; types of pain.
- Substance abuse and addiction: terminology, definitions; drugs of abuse and addiction; identifying the risk factors; and who is prone?
- Epidemiology of SUD and addiction: Global, US, state, and local; age, gender, race, geographic predilection, and others.
- Evaluating analgesic studies and the Opioid Analgesic Reduction Study (OARS study.)
- Principles of sound pain management: safe pharmacological management of dental pain; acute and chronic pain.
- Neurophysiology and pharmacology of substance abuse and addiction: neurotransmitters; reward pathways; brain centers of substance use and addiction.
- Pharmacologic management of substance use disorder: medications and regimens commonly used for SUD: opioids, alcohol, tobacco, others. Reversal agents.
- Referral: who, when, to whom? Follow up and what to avoid in a de-addicted person.

### READING ASSIGNMENT:

Literature review (self-study.) Upon registration, a pdf of 8 to 10 articles will be emailed for home study/reading.

This portion is worth 1.5 credit hours.

### At the completion of the course, you will be able to:

- Understand the basics of pain physiology, mechanisms, and principles of sound pain management.
- Learn to identify patients with the potential for substance use disorders and prevention of SUD.
- Learn safe pharmacological management of dental pain.
- Understand the basics of pharmacology of the treatment of SUDs.
- Know the fundamentals of reversal agents, de-addiction, and rehabilitation.
- Learn how and when to refer these patients and to whom.
